

I am opposed to any changes of the FCC indecency standards that would allow television and radio stations to broadcast nudity and indecent language even if it occurs only once. Our society, communities and Families do not need any more filth coming from the broadcasting centers in this country. Many people would be exposed to unwanted language and obscene imagery that would do everything but serve the viewer. I know the FCC cares about what is allowed in our homes so I urge you to please oppose what will be a harmful change in our society.

Thank you,

Will Edgel
